

## Spring 2023 Catalog

Choosing the right tree for the conditions at your planting location will help the tree enjoy a long, healthy life. If you have questions, our volunteers may be able to help. Email [info@300trees.org](mailto:info@300trees.org).

### Beaked Hazelnut ☀️☀️

- Prefers sun to part shade
- Soil moist to fairly dry
- 15' mature height
- *Bears nuts if you have two trees to pollinate.*

### Cascara ☀️☁️

- Grows in sun or shade
- Soil wet to dry
- 30' mature height
- *Best in partly sunny, well-drained site.*

### Chokecherry ☀️☁️

- Grows in sun to mostly shade
- Soil moist to dry
- 25' mature height
- *Bears fruit for wildlife.*

## Douglas Fir ☀️🌿

- Grows in sun to part shade
- Soil moist, well-drained
- 80' mature height
- *Thick, fire-resistant bark. Tolerates drought when established. Great for wildlife.*

## Oregon White Oak ☀️🌿

- Grows in sun to part shade
- Soil dry
- 75' mature height
- *Also known as Garry Oak. Good for wildlife.*

## Pacific Crabapple ☀️🌿

- Grows in sun to part shade
- Soil wet or dry, adaptable
- 35' mature height
- *Bears fruit for wildlife.*

## Red Alder ☀️

- Needs full sun
- Soil wet or dry, adaptable
- 45' mature height
- *Supports healthy ecosystems.*

## Red Elderberry ☀️☀️

- Grows in sun to part shade
- Soil moist to wet
- 7' - 20' mature height
- *Feeds native pollinators and birds. Seeds are mildly poisonous, so best to leave fruit for the birds.*

## Saskatoon Serviceberry ☀️☀️

- Grows in sun to part shade
- Soil moist to dry
- 20' mature height
- *Attractive spring flowers, edible fruit.*

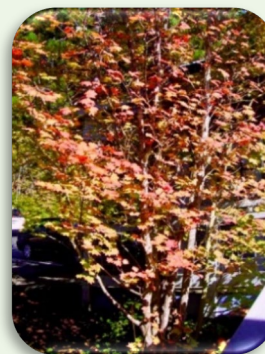

## Shore Pine ☀️

- Enjoys full sun
- Soil wet or dry, adaptable
- 40' mature height
- *Supports healthy ecosystems.*

## Vine Maple ☀️☁️

- Part sun to shade
- Soil wet to moist (tolerates seasonal dryness)
- Mature height: 25'
- *Great for shady rain gardens. Multi-stemmed understory tree.*

Where should I plant my tree? These guidelines from the City of Bellevue will give the tree room to grow and be safe for people and infrastructure.
